Waste Discharge Authorization Number 296 for Ash Grove  
Cement West, Inc

Dear Mr. Fernow:

The Metro Industrial Waste section has reviewed your application for a waste discharge permit for Ash Grove Cement West located at 3801 East Marginal Way South, Seattle, Washington and determined that the attached minor discharge authorization is the appropriate document for this discharge. There is no fee for this authorization.

This authorization permits you to discharge limited amounts of wastewater into the Metro sewer system in accordance with the effluent limitations and other requirements and conditions set forth in the document and the regulations outlined in Metro Resolution No. 3374 (enclosed). The formal requirements and fees of a full wastewater permit will not be required as long as you maintain good compliance and do not change the nature and volume of your discharge.

Changes to, or additions at, 3801 East Marginal Way South, may cause us to reassess this decision and require that you obtain a full wastewater discharge permit. If you propose to substantially increase the volume of your discharge or change the type and quantities of substances discharged, you must submit a new waste discharge permit application to Metro. State law requires that such application for a permit be made a minimum of sixty (60) days before starting a new discharge. Therefore, to avoid delays, please time your submittal accordingly.
